Profile

Motivated Electronics and Communication Engineering (ECE) graduate currently working as a Full-Stack Developer Intern, with hands-on experience in building web applications using React, Redux, Next.js, JavaScript, TypeScript, Node.js, Express, MongoDB, SQL, Git, and REST APIs. Skilled in developing responsive UIs, implementing secure authentication flows, integrating backend services, and managing state efficiently. Currently working on a Role-Based User Management System featuring user authentication, authorization, secure access control, and scalable architecture. Strong understanding of component-driven development, server-side rendering, API handling, and full-stack workflows. Possesses additional foundation in Embedded Systems, Verilog, C, C++, Python, IoT, MATLAB, and FPGA concepts, providing strong analytical thinking, problem-solving skills, and hardware-software understanding. Certified in Web Development, VLSI, Embedded Systems, IoT, and completed advanced Udemy coursework in React, Redux, and Next.js. Passionate about continuous learning, clean code practices, and delivering real-world software solutions.

Internship

eTech Prowess - Web Technologies

- Acquired foundational knowledge of HTML, CSS, JavaScript, and SQL for front-end and database development.
- Gained hands-on experience in web development using VS Code and modern development tools.
- Developed interactive web pages and dynamic UI components. Learned best practices in responsive design, debugging, and code optimization. Strengthened problem-solving skills through real-world projects and practical implementation.

Full-Stack Developer Intern

Radical Now Lab | [August 2025 – November 2025]

- Working on a Role-Based User Management System with authentication, authorization, and secure access control
- Building front-end interfaces using React, Redux, and Next.js with reusable and scalable component structures
- Developing backend services and REST APIs using Node.js and Express
- Designing and managing data models using MongoDB and SQL for user, role, and permission mapping
- Implementing JWT-based authentication, session handling, and protected route logic
- Using Git and GitHub for version control, collaboration, and workflow management
- Debugging, optimizing performance, and improving code quality through reviews and iterations
- Working in an agile development environment with daily task tracking and feature deployment
- Integrating UI with backend endpoints and ensuring smooth API communication
- Strengthening full-stack problem-solving skills through real-world application development

Education

II PUC, VIJAYA BIFR PU COLLEGE

Percentage : 64%

2020 – 2021

10TH (STATE BOARD OF KARNATAKA), ST. ANTONY HIGH SCHOOL

Percentage : 72%

2018 – 2019

BE, DON BOSCO INSTITUTE OF TECHNOLOGY

CGPA : 7.6/10

Bengaluru, India

Skills

Technical skills.

Front-End Development

- HTML
- CSS
- JavaScript
- React.js
- Next.js
- Responsive UI Design
- Component-Based Architecture

Back-End Development

- Java
- Node.js
- REST API fundamentals
- Server-side logic basics
- ♦ **Databases**
- SQL (MySQL / PostgreSQL basics)

Tools & Platforms

- Git
- GitHub
- Visual Studio Code
- Postman

Programming Languages

- C, C++, Java, Python (Basic)

Soft skills

- Problem-Solving
- Analytical Thinking
- Teamwork
- Adaptability
- Debugging

Projects

Arduino LoRa Free SMS Project

- Developed a long-range, cost-effective communication system using LoRa technology and Arduino. Enabled SMS-like message transmission without cellular networks by implementing a custom LoRa communication protocol.
- Programmed Arduino boards using C/C++ in Arduino IDE, integrating LoRa libraries for seamless connectivity. Designed message structures, implemented error detection with CRC checks, and ensured reliable delivery through acknowledgment mechanisms.

Subway Automatic Ticket Booking System (Verilog, FPGA)

- Implemented a real-time, FSM-based ticketing system using Verilog on FPGA, integrating biometric, NFC, QR, and cash payments to streamline subway ticket transactions and enhance commuter experience.
- Developed a responsive web-based frontend for the ticket booking system using HTML, CSS, and JavaScript, allowing users to select routes and payment methods easily.

Certification

- Modern React with Redux  -udemy
- Node with React fullstack web Development-udemy
- Web Technologies - eTech Prowess,May2025
- Basics of Python – Infosys Springboard, July 2024
- TechA Network Hacking Prevention Foundation Certification – Infosys Springboard, Nov 2024

Languages

- English
- kannada
- Tamil
- Hindi

Declaration

I hereby declare that the information presented in this resume is true and accurate to the best of my knowledge. I assure you that my experience, skills, and qualifications meet the requirements of the job and I am committed to making a positive contribution to your organization
