PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience designing and deploying scalable web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Proven ability to integrate REST APIs, implement JWT and RBAC authentication, optimize frontend performance through code splitting and lazy loading, and build responsive, accessible UIs. Experienced in Agile/Scrum environments with CI/CD and Docker, committed to clean, modular, and maintainable code.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux, Responsive UI/UX

Backend: Node.js, Express.js, REST APIs, Microservices

Databases: MongoDB, MySQL, PostgreSQL, Supabase

Auth & Security: JWT, Role-Based Access Control (RBAC), Row Level Security (RLS)

DevOps & Tools: Git, GitHub, Vercel, CI/CD, Docker, Postman, Swagger, VS Code

Testing & SEO: Unit Testing, API Testing (Postman), Performance Optimization, SEO, Web Vitals

Methodologies: Agile, Scrum, Modular Architecture, Clean Code

WORK EXPERIENCE

Software Engineer Intern | *Radical Now Consulting & Education*

Aug 2025 – Mar 2026

- Designed and developed full-stack application features using React.js and Next.js, contributing to 3+ major feature releases aligned with business requirements.
- Integrated 10+ RESTful APIs enabling seamless cross-module data flow, reducing manual data-handling effort by ~40%.
- Implemented JWT and Role-Based Access Control (RBAC) for multi-role authentication, eliminating unauthorized access incidents.
- Optimized frontend performance via code splitting, lazy loading, and memoization, achieving ~30% reduction in page load time.
- Reduced reported bugs by ~25% through systematic debugging, testing, and code reviews within Agile/Scrum bi-weekly sprints.
- Collaborated with designers, backend engineers, and product managers to consistently deliver reliable bi-weekly releases.

Web Technologies Intern | *eTech Prowess*

Feb 2025 – May 2025

- Developed responsive web applications using HTML5, CSS3, and JavaScript, improving cross-device compatibility by 15% across projects.
- Built 10+ reusable interactive UI components that enhanced user experience and engagement across client deliverables.
- Assisted in debugging and feature implementation, contributing to 20% faster project turnaround on key client deadlines.

PROJECTS

Ovum – Doctor Appointment Booking Website <https://dr-chaitra.vercel.app/>

Stack: React.js, Next.js, Node.js, MongoDB, JWT

- Built a full-stack booking platform with JWT authentication and REST APIs covering 5+ core entities (users, doctors, appointments).
- Optimized performance and responsiveness across devices; improved Lighthouse performance score by ~20 points.

Ovum – Birth Story Management System <https://ovumbirthstory.com/>

Stack: Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS

- Developed a secure hospital application for managing birth stories with role-based authentication.
- Implemented CRUD operations, PDF generation, image uploads, and search/filter functionality.
- Integrated Supabase Authentication, PostgreSQL, and Storage with Row Level Security (RLS).

Elysyal – Service-Based Web Platform <https://elysyal-revamp.vercel.app/>

Stack: Next.js, React.js, Tailwind CSS, CI/CD

- Developed 15+ scalable reusable frontend components; improved SEO metadata and deployed via CI/CD pipeline on Vercel.
- Delivered responsive, accessible UIs across desktop and mobile; optimized page load speed for improved search visibility.

EDUCATION

B.E. – Electronics & Communication Engineering (ECE)

2021 – 2025

Don Bosco Institute of Technology, Bengaluru | CGPA: 7.6

CERTIFICATIONS

Modern React with Redux (Udemy) | Full Stack Web Development (Udemy) | Web Technologies (eTech Prowess)
